#### PUBLIC LIGHTING GENERAL

**DESIGNATION:**

PLG

**AVAILABLE:**

Everywhere in Puerto Rico

**APPLICABLE:**

This rate shall apply to the lighting of: streets, ball parks and other parks of free admission, plazas, telephone booths, bus shelters, and traffic and police strobe lights. The Puerto Rico Electric Power Authority (PREPA) will provide the conservation and renewal of lamps, brackets, photocells, standard poles, wiring and other street lighting accessories, to systems transferred to PREPA and to *dusk to dawn* luminaries. PREPA will not provide the conservation and renovation of materials to: street lighting systems that have not been transferred to PREPA, traffic lights, free admission parks, telephone booths, bus shelters, and police strobe lights. Unless indicated, the customer shall pay for the materials, labor, and other costs related to the installation or retirement of equipment needed for the connection with PREPA's system.

The following services: street lighting, *dusk to dawn*, and telephone booths will be controlled by a photocell that activates each lamp during the night and deactivates it during the day, on series or multiple systems, at PREPA's option. The photocell must be designed so that if it becomes damaged, the lamp will remain off. Each lamp will be on approximately 4,000 hours in a year.

The following tables present an estimate of the consumption in kWh for each type of lamp of street lighting systems. Also, PREPA will estimate the consumption of telephone booths, bus shelters, and police strobe lights. For other uses, service shall be rendered through one point of delivery and one meter provided and installed by PREPA. All services under this rate must have a connected load less than 50 kVA.

**CONTRACTED LOAD DETERMINATION:**

The power producer shall, by a signed contract, establish the capacity requirements in kVA for each one of the requested services and it will be known as contracted load. This load will be enforced through the term of the contract, unless both parties consent to change it with a previous agreement. PREPA will exercise the right to establish the maximum capacity to be served under this rate and it is not forced to serve a load higher than 110% of the contracted quantity. If for two consecutive billing periods the power producer maximum demand exceeds the contracted load, the higher demand will be used as the new contracted load.

**SPECIAL REQUIREMENTS:**

A service fee equal to \$8.58 per kVA of contracted load will be required for service during the startup period. This service will be provided after the payment of this fee by the power producer. The power producer will contract additional startup periods in blocks of five months, after a five months initial startup period. These additional startup periods will be subject to the service fee. PREPA will officially certify the termination of the startup period of the power producer generating units.

The programmed maintenance period will be determined according to the Purchase Power Agreement.

If meter readings, energy and demand, are performed at the secondary side of the customer's substation, the readings shall be referred to the primary side, which is the point of delivery, using a correction factor to account for transformer losses.

**TERM OF CONTRACT:**

The term of contract is five-month periods for startup service and one year for maintenance programmed and backup services.

Subsidized General Residential Service Rate (GRS) for handicapped, elderly or college students); Lifeline Residential Service (LRS) Rate and Residential Service for Public Housing (RH3) Rate, include the Fuel Oil Subsidy when the customer's monthly consumption does not exceed 500 kWh

The Fuel Oil Subsidy will apply to qualifying residential customers with monthly consumption of up to 500 kWh. A Fuel Oil Subsidy Factor will be calculated and adjusted quarterly to apply this subsidy.

For the first \$30 per barrel of fuel oil, excluding natural gas, customers under this subsidy will receive a credit equivalent to the Fuel Oil Subsidy Factor multiplied by the customer's monthly consumption in kWh, up to a consumption of 400 kWh.

For customers with consumption between 401 and 425 kWh, the customer will receive a credit equivalent to the amount received with a consumption of 400 kWh.

For customers with a consumption of between 426 kWh to 500 kWh, the credit will be phased out from the credit received at 425 kWh to reach 0 at 500 kWh.

**NET METERING CREDIT RIDER**

**DESIGNATION:**

NM

**AVAILABLE:**

Everywhere in Puerto Rico

**APPLICABLE:**

To all tariffs with metered output.

The Net Metering credit is calculated from the customer's bills as per the provisions of Act 114-2007, as amended. Customers with a Net Metering Agreement with PREPA will receive a monthly credit from the energy produced by their system and exported into PREPA's electrical system, up to a customer's monthly consumption in kWh, subject to other limits as detailed in Act 114-2007, as amended, and the corresponding Regulations. The monthly credit for customers with a Net Metering Agreement will be effective at the beginning of the billing period after the installation or configuration of the appropriate meter. For each billing period, PREPA will meter the energy consumed by the customer (inflow) and the energy exported by the customer's system to PREPA's system (outflow).

Each Net-Metering customer shall pay for the net energy supplied by PREPA the full rate for its class, including the base rates, fuel charge, purchased power charge, CILT charge, SUBA-HH charge, SUBA-NHH charge, and EE charge, subject to the following:

1. Each billing period, in which the energy exported by the customer is lower than the energy supplied by PREPA, the credit for the energy exported shall be the sum of: customer's base rate energy charge, fuel charge, purchased power charge, SUBA-HH charge, SUBA-NHH charge, CILT, and Energy Efficiency Charge.
2. If during a billing period, the energy exported by the customer is equal or higher than the energy supplied by PREPA, the credit will be limited to the energy supplied by PREPA in that billing period. The excess exported energy will be accumulated to be used in the next billing period.
3. If any excess energy accumulated remains after the end of the current fiscal year, it will be credited as provided by the law, and to the corresponding Regulations, currently as explained below.

PUERTO RICO ELECTRIC POWER AUTHORITY

- a. Seventy-five percent (75%) of the excess energy accumulated shall be purchased by PREPA at a rate of 10 cents per kilowatt-hour (¢/kWh) or the resulting quantity in ¢/kWh, once the fuel and purchased power charges are subtracted from the total ¢/kWh, whichever is the highest; and
- b. The remaining twenty-five percent (25%) shall be granted to PREPA to be distributed in credit or reductions in the electricity bills of public schools.

**LOAD RETENTION RIDER**

**DESIGNATION:**

LR

**AVAILABLE:**

Everywhere in Puerto Rico

**APPLICABLE:**

To all tariffs.

The Load Retention Rider will be available to any customer who can document that an option exists for them to reduce or eliminate electric consumption from PREPA either by relocation or the installation of an alternative energy source. The intention of this rider is to provide a discount when necessary to retain load that would otherwise be lost, provided the discounted rate generated revenues exceeding the incremental cost of serving the load. The discounts shall be no greater than necessary, shall not encourage wasteful consumption, and shall not pose an obstacle to the development of economical renewable energy.

Estimate of Discount

PREPA will perform a study and estimate whether the discounted rate generates revenues that exceed the incremental cost of serving the customer's load. A discount will only be offered in cases where the discounted cost to serve the customer exceeds PREPA marginal cost of service.

The estimated discount will be applied to the applicable PREPA rate which the customer will receive service.

Review and Approval by the Puerto Rico Energy Bureau

When an agreement is completed by PREPA and the customer a filing shall be made before the Puerto Rico Energy Bureau (PREB). Any customer specific information shall be confidential. The Puerto Rico Energy Bureau shall have sixty (60) days to rule on the application and either approve or disapprove the agreement. If the contract is approved PREPA shall execute the agreement.
