

LUMA is proud to serve our 1.5 million customers across Puerto Rico. Over the past year, we have made incredible progress toward building a more reliable, more resilient and cleaner energy system.

2022 BY THE NUMBERS

In 2022, LUMA accelerated federally funded projects, expanded renewable energy across the island and worked to improve reliability and resiliency of the grid. Through these actions, we are building the customer-focused electric system Puerto Rico expects and deserves.

BUILDING A MORE RELIABLE AND RESILIENT SYSTEM

ACCELERATING RECONSTRUCTION PROJECTS

LUMA advanced more than **\$6.7B in reconstruction projects**, with **30 already under construction** to repair the grid and provide better service for customers.

IMPROVING SAFETY AND EFFICIENCY

LUMA has replaced over **31,000 streetlights** in the municipalities of Aguada, Aibonito, Cataño, Guánica, Lajas, Luquillo, Maunabo, and Villalba, increasing public safety and improving energy efficiency in the community.

MODERNIZING SUBSTATIONS

LUMA launched the Substation Modernization Initiative representing over **\$58M federal funds** to modernize substations across Puerto Rico.

IMPROVING RELIABILITY

LUMA installed **100 automatic recloser devices**, which limit the frequency and duration of outages that affect customers.

ADVANCING CLEAN ENERGY

BUILDING A CLEANER PUERTO RICO

LUMA connected **200MW of new renewable energy to the grid**, growing the island's renewable energy footprint and accelerating Puerto Rico's clean energy revolution.

EXPANDING ACCESS TO RENEWABLE ENERGY

LUMA connected more than **36,500 new rooftop solar customers** to the grid, more than double the number of connections made over the prior decade.

ADVANCING UTILITY SCALE RENEWABLE PROJECTS

LUMA completed an EV plan and studies to **connect 1,300 MW of utility scale renewable generation to the grid**, opening the opportunity to provide more clean energy to customers than ever before.

LOOKING AHEAD

The more than 3,000 men and women of LUMA will continue building a more reliable and cleaner energy future.

- ✓ Advancing **264 federally funded** reconstruction projects focused on improving the reliability of Puerto Rico's grid.
- ✓ Expanding clean energy access to an additional **2,800+ customers** each month, creating a more sustainable and clean energy future for our customers.
- ✓ Opening a state-of-the-art **LUMA College** in Canóvanas, providing certified training and promoting employee and public safety.
