

2026 Planned Generation Outage Report

This report shows the scheduled maintenance outages for all generators for the current and upcoming year. The Original Approved Outage (in green) is the outage schedule approved by LUMA and the generator once the scheduling cycle closes. The Current Outage Schedule (in blue) represents the changes in schedule incurred by the generator after the scheduling cycle closed.

2026 Planned Generation Outage Report

Unit	Effective Schedule?	Outage Version	Outage Start Date	Outage End Date
SJ 9	Yes	v1	11/30/2025	3/28/2026
SJ CT 6	Yes	v1	12/30/2025	1/17/2026
PS 3	Yes	v1	1/14/2026	2/28/2026
AES 2	Yes	v1	2/21/2026	3/21/2026
AES 1	Yes	v1	10/3/2026	10/31/2026
CS 5	Yes	v1	10/4/2026	11/15/2026
ECO CT 2	Yes	v1	10/24/2026	11/18/2026
ECO CT 1	Yes	v1	10/31/2026	11/3/2026
ECO STG	Yes	v1	10/31/2026	11/3/2026
PS 4	Yes	v1	11/15/2026	12/26/2026
AG 2	Yes	v1	12/20/2026	2/14/2027

2026 Planned Generation Outage Report

Planned generation outages are a normal and necessary aspect of managing the power system. These outages are carefully coordinated to minimize the impact on overall grid reliability and ensure that adequate generation capacity remains available. LUMA Energy works diligently with generation owners, operators, and the Puerto Rico Energy Bureau to manage these schedules in accordance with our Agreed Operation Procedures (AOP) and Power Purchase and Operating Agreements (PPOA).

This report outlines the planned maintenance for generation and does not guarantee uninterrupted service for individual customers. Local service interruptions may occur for various reasons that are not necessarily related to this planned generation maintenance. While LUMA Energy strives to ensure that the information provided in this report is accurate and complete, we make no warranties or guarantees, either expressed or implied, regarding the absolute accuracy or completeness of the data.

The purpose of this publication is to release the report in July, allowing at least one year's advance preparation. The reports from the generating companies under the PPOAs, namely AES and Ecoelectrica, for July through October will contain preliminary information; While this information is valid and has been reviewed and approved by these entities for LUMA, it is subject to change once they submit the final plan during the mandatory month outlined in their PPOA.

This schedule is intended to provide customers with an overview for their planning purposes. However, customers should use their judgment and not rely solely on this report for critical decisions that may be influenced by energy availability. For additional information about LUMA Energy's operations, service updates, or to report an outage, please visit our website at lumapr.com or contact our customer service at 1-844-888-5862.
